

# INDUSTRIAL AG CHEMICAL CLEANING AND DISPOSAL

Mistakes are expensive. From delivery delays to restocking a contaminated supply, the costs of not getting chemical cleaning right the first time can pile up fast. **PUT THESE WORRIES BEHIND YOU. TRI RINSE CAN TAKE IT FROM HERE.**

## WITH TRI RINSE, YOU CAN EXPECT:

- **Turnkey service** that includes multisite coordination, site safety plans, cleaning, analysis and disposal.
- **The job to get done safely** by a crew with proper training and equipment.
- **Scheduling** that works for you.
- **Scale.** Three crews working year-round ensure no project is too big or small.
- **Expert-level specialization** in ag-specific chemicals, their uses and associated liability concerns.

## WE DO ALL THAT SO YOU CAN HAVE ALL THIS:

- **On-time product delivery and the comfort in knowing your tank system is clean.**
- **Increased asset utilization and more time with tanks storing valuable products instead of waiting for cleaning.**
- **Decreased risk** of chemical cross-contamination, regulatory noncompliance and worker exposure.
- **Peace of mind** that the job gets done – and gets done right the first time!

# CONTAINER MANAGEMENT & IBC TOTE SERVICES

Empty containers with chemical residue are a risk. And as those containers pile up, so does the risk. Tri Rinse offers 100% risk mitigation with one phone call. We provide a turnkey solution that covers cleaning, disposal, recycling, container assembly and life-cycle tracking, all within ANSI/FFRA guidelines. **WE'RE EXPERTS IN THIS. WE'VE BUILT OUR REPUTATION ON SOLVING THESE PROBLEMS.**

## HERE'S HOW WE IMPROVE EFFICIENCY AND REMOVE RISK:

- **ANSI/FIFRA** expertise to ensure compliance.
- **Flexible equipment** and processes designed to safely handle all types of containers in the ag supply chain.
- **Acceptance of non-rinsed containers**, saving you time and expense.
- **Multiple locations** in the heartland of the Midwest with corresponding transportation services.
- **Clean and repair your container** to extend its useful life and return it back to us for proper end-of-life recycling.
- **Zero discharge of rinse water and waste**, and promotion of incineration when appropriate.

## WE ALSO OFFER UNMATCHED IBC TOTE SERVICES:

- **Recycle:** Get your cage back with a new bottle in less than seven days.
- **Recondition:** Get your clean, ready-to-use IBC tote back in five days.
- **Purchase:** New 275 and 135 gal. units with guaranteed delivery in three weeks.

## FORMULATION AND PACKAGING

**A TOTAL SOLUTION.** With herbicide, insecticide and fungicide capability, we formulate, analyze, package, store and ship your products all from one central location in St. Louis. This allows you to easily capitalize on market opportunities and adjust to ever-changing SKUs.

Whether you need a trial run of 4-ounce bottles or a bulk fulfillment for your largest customers, we're here to help. We pride ourselves at tackling tough projects others are reluctant to take on. Since 2007, **IT'S BEEN OUR COMMITMENT TO STAY FLEXIBLE SO YOU CAN STAY FLEXIBLE.**

### HERE ARE SOME OF THE BENEFITS YOU GET WITH TRI RINSE:

CAPABILITY TO PRODUCE UP TO 65 DIFFERENT PRODUCT TYPES **ON ONE PRODUCTION LINE,** IN ONE MONTH.

- **Engineered for flexibility.** Packaging lines designed so we can switch products and containers efficiently.
- **Speed up product launch.** With our co-packaging capabilities, you can sell multiple products together to beat competitors to the market with multi-chemical solutions.
- **Quality assurance and control.** Processes, procedures, training and audits to ensure your product is right the first time.
- **Decreased complexity.** With 900,000 square feet of warehousing across agriculture's heartland, you don't have to worry about finding transportation and warehousing. Your order gets to where you want it to go, when you want it to get there.
- **World-class customer service.** Helping your team with everything from PKI review and development to SAP data entry for shipment. This is our life. We know what you're up against, and we're here to help.

# SEED BOX MANAGEMENT

You didn't get into the seed business to manage boxes. Luckily, we did. We clean more than a quarter million seed boxes a year, fix more than 130,000, and have more than a million square feet of inventory storage warehousing.

We pick up, clean, repair, store, deliver and track the life cycle of boxes so you can focus on your core business. **OUR AG-SPECIFIC EXPERTISE WORKS TO MAKE SURE YOUR BOXES ARE WORKING FOR YOU, NOT THE OTHER WAY AROUND.**

## HERE'S HOW TRI RINSE KEEPS YOUR BOXES FROM BOXING YOU IN:

- **Reduce new box purchases.** *Buying a new box costs seven times more than repairing one. We keep costs down by refurbishing boxes and keeping them in your fleet for longer.*
- **Transparent data information.** *We can track the real-time status of your boxes at the individual level so you can stay on top of procurement decisions.*
- **Box cleaning.** *Your boxes have limited value to you if they can only be used for a single crop. Our proprietary cleaning process ensures your boxes are available to use for any seed at any time.*
- **Multiple locations decrease transportation cost.** *With four full-service locations, you won't be overspending to ship empty boxes halfway across the country and back.*
- **Program customization.** *Our operation complements your capabilities. We work to supplement where you need help, not to duplicate your efforts.*
- **Logistic services.** *Transportation services with custom trailers that reduce costs by thirty five percent per load.*
- **Exemplary service.** *This is our life. We get what you're up against, and we're here to help.*

New box cost:

**\$400**

Average cost of bi-annual repairs:

**\$55**

Tri Rinse can extend the life cycle of your fleet by **14 years** before the price of a new box is justified.
